

Single Carriage three System Motorized Feeder

Single carriage three system motorized feeder independent control by the system, real-time monitoring and feedback, real-time, faster, more stable. The following is an introduction to single carriage three system motorized feeder, we hope to help you better understand single carriage three system motorized feeder. Welcome new and old customers to continue to cooperate with us to create a better future together!

Qianglong is one of the famous single carriage three system motorized feeder manufacturers and suppliers in China. Qianglong is a high-tech private enterprise mainly engaged in the design, development and manufacture of knitting machinery in Zhejiang Province. Over the past 35 years, we have been focusing on the production and development of single carriage three system motorized feeder. With our rich professional experience and strong technical support, we have established a relatively complete marketing network and after-sales service system. After years of scientific research and development and market development, our single carriage three system motorized feeder has covered China, Europe, Africa, South America, Argentina and other multinational fields, and is favored by domestic and foreign customers. The automatic avoiding technology of the yarn nozzle can automatically calculate the parking position of the yarn nozzle, no need for the machine head to kick the yarn, greatly saving the weaving trip. And support up to 32 nozzle, nozzle automatic arrangement. Through the yarn nozzle can automatically switch to achieve multi - color wool effect and single - stitch wool effect.

Product Feature:

- ① Drive and control integrated servo motor, yarn carrier with independent control, real-time, faster, more stable.
- ② Servo flexible algorithm, fast start and stop, precise position.
- ③ Feeder collision avoidance technology: the system automatically calculates the parking position of yarn carrier, without need to kick the yarn. greatly saving the knitting length.
- ④ Support 32 yarn feeders that are automatically arranged.
- ⑤ Same-line multi-color plaiting technology, no need for head rotation: automatic switch of the yarn carrier realizes the multi-color plaiting effect.
- ⑥ Same-line single needle plaiting technology, no need for head rotation: automatic switch of the system achieves the single-needle plaiting effect.

Product Parameter:

Gauge	5G、7G、8G、9G、10G、12G、13G、14G、15G、16G、18G、357G
Carriage	Single Carriage, Three System
Knitting Range	44" /52" /60" /66" /72" /80" /100"

Specifications and Configurations Should Be Subjected To The Contract.
